

Assembly Instructions

--- Outward fold 

--- Inward fold 

✗ Cut away parts

Instructions

1 Separate all parts along the lines. Mark their identity on the back to avoid confusion.

2 Cut out parts which are marked with an 'x'.

3 Use a pen whose ink has dried out, or a tracer, to trace lines first.

4 Fold all parts along the lines.

5 Bind A1 and B1 together with concave parts first. Then glue all pairs of A1 and B1 together according to the assembly instructions. You have a cactus!

6 Roll and glue P04 and P05 separately. Glue these two parts together to form a pot.

7 Glue the cactus to P02.

8 Glue the cactus to the pot and P03 to the bottom of the pot. You now have a green houseplant to add energy to your life!
